Dzmitry Vesialou

C# SOFTWARE ENGINEER | .NET BACKEND DEVELOPMENT

Warsaw, Poland | linkedin.com | vesialou.doc@gmail.com | +48666297094 | Portfolio ASP.NET Core Microservices => github.com

PROFESSIONAL PROFILE

C# software engineer with 8+ years of commercial experience, including 5 years working on large-scale production mobile games with 50M–100M+ downloads and over 1M daily active users. Experienced in modular architecture, asynchronous workflows, system integration, testing and production troubleshooting. Now transitioning to ASP.NET Core backend development, bringing extensive production engineering experience and hands-on backend practice from independent projects.

TECHNICAL EXPERIENCE — BY CONTEXT

Commercial C#: C#, .NET, software architecture, dependency injection, async/await, unit testing, SDK/API integration, server-driven features, code reviews, profiling, production logging/monitoring, CI and release support.

Independent backend practice: ASP.NET Core, REST API, EF Core, PostgreSQL, Redis, RabbitMQ, Nginx , HAProxy, Docker, TypeScript, React (basic) , xUnit, k6, Azure.

COMMERCIAL EXPERIENCE

Senior Unity Software Engineer | Tripledot Studios (2,500+ employees)
Dec 2025 – Jun 2026 • Warsaw, Poland

- Owned C# feature development end-to-end, from technical design and implementation to code reviews, QA support and release.
- Designed and refactored modular systems with separated responsibilities, extensible architecture and fallback logic.
- Integrated backend-driven configurations and internal SDKs using asynchronous workflows and dependency injection; optimized resource loading and memory usage.

Unity Developer | Playtika (3,500+ employees)
Jul 2020 – Aug 2025 • Warsaw, Poland

- Developed and maintained C# systems across large-scale production games: Best Fiends (100M+ downloads, 1M+ DAU), Board Kings and Solitaire Grand Harvest (50M+ Android installs each).
- Implemented and tested deterministic, state-driven systems using command processing, replay validation and unit tests; optimized runtime performance.
- Worked with backend API contracts and server-driven features, including configurations, events, feature flags and rewards; investigated client-server integration issues.
- Investigated production incidents using Grafana/Kibana, logs and crash reporting; supported on-call rotations, hotfixes, CI, releases and code reviews.

Unity Developer | Core5
Aug 2019 – Jul 2020 • Minsk, Belarus

- Developed C# gameplay and UI flows for a pre-soft-launch card game, including state handling, event flows, analytics instrumentation and debugging of progression edge cases.

Unity Developer / C# Developer | Ray Games Mobile
Jun 2018 – Aug 2019 • Minsk, Belarus

- Sole developer of a mobile C# game and a small commercial ASP.NET/MySQL service for compressed level-data delivery and player information; implemented progression, game logic and debug tools.

Software Engineer (C#) | Automation & Control Systems Dept.
Minsk Electrotechnical Plant Apr 2015 – Apr 2019 • Minsk, Belarus

- Developed C#/Delphi desktop software and API-driven integrations for manufacturing workflows, including data processing, operator-facing tools and workflow automation.

EDUCATION — TWO BACHELOR'S DEGREES

Software Engineering & Information Technology — BSUIR (2014–2017)
Mechanical Engineering — BNTU (2008–2014)

FOREIGN LANGUAGES

English — B2 | Polish — B2+
