Dzmitry Vesialou

UNITY DEVELOPER (C#) | GAMEPLAY SYSTEMS & LIVEOPS

Warsaw, Poland | linkedin.com/in/vesialou-warsaw | vesialou.doc@gmail.com | +48666297094

PROFESSIONAL PROFILE

Unity developer with 8+ years of commercial experience building and supporting mobile games. Focused on gameplay architecture, deterministic systems, LiveOps integration, feature delivery, performance and production stability.

TECHNICAL EXPERIENCE

Unity / C#: Unity, C#, UGUI, ScriptableObjects, async/await, UniTask, VContainer, Zenject, StrangeIoC, Entitas, DOTween, Addressables, AssetBundles.

Engineering / Production: data-driven gameplay, fixed-tick simulation, pooling, profiling, editor tooling, server-driven features, SDK integration, logging/monitoring, CI builds, code reviews.

COMMERCIAL EXPERIENCE

Senior Unity Software Engineer | Tripledot Studios
Dec 2025 – Jun 2026 • Warsaw, Poland

- Feature Owner for gameplay and LiveOps work across existing mobile titles: technical breakdown, estimation, coordination with QA/backend, reviews and release delivery.
- Extended core Mahjong tile behavior with memory-pair mechanics; refactored power-up rewards into modular processing with filtering and fallback handling.
- Implemented server-configured regional tile-set loading, avoiding unnecessary assets and duplicate memory use.
- Integrated SDK-driven offer popups, persistent badges and startup popup ordering into asynchronous legacy UI flows; reviewed peers' code.
- Worked within VContainer/DI and service-locator codebases, using UniTask and state-machine patterns to coordinate UI lifecycles and SDK edge cases.

Unity Developer | Playtika
Jul 2020 – Aug 2025 • Warsaw, Poland

- Contributed to the Best Fiends gameplay core rewrite using a deterministic fixed-tick C# model decoupled from UI; implemented gravity, sliding, blockers and ability interactions.
- Implemented command-chain logic, deep-copyable gameplay states, replay/record validation and unit-tested mechanics to strengthen regression safety.
- Extended data-driven mechanics with HP/charge/state behavior and command propagation across complex board interactions under deterministic update order.
- Built gameplay editor and debug/validation tools; optimized mobile runtime performance through object pooling and reduced allocations.
- Delivered LiveOps events, rewards and cosmetic flows with server-driven configuration; investigated production issues via logs, dashboards and crash reports, supporting on-call investigations, hotfixes and releases.
- On Board Kings, implemented collection/sticker mechanics and backend-configured event, popup and reward flows with runtime synchronization edge cases.
- On Solitaire Grand Harvest, adapted legacy gameplay to Entitas/Zenject systems, preserving gameplay behavior and progression flows.

Unity Developer | Core5
Aug 2019 – Jul 2020 • Minsk, Belarus

- Built gameplay and UI flows for a pre-soft-launch 2D card battler: tutorials, map and event mechanics, analytics, progression debugging and rapid feature iterations.

Unity Developer | Ray Games Mobile
Jun 2018 – Aug 2019 • Minsk, Belarus

- Sole Unity developer for a mobile bubble-shooter: hex-grid/pathfinding, reaction chains, progression, level delivery and debug tools; improved frame stability and built an ASP.NET/MySQL content service.

Software Engineer (C#) | Automation & Control Systems Dept.
Electrotechnical Plant | Minsk, Belarus Apr 2015 – Apr 2019 • Minsk, Belarus

- Developed C#/Delphi desktop applications, operator tools and API-based integrations for manufacturing workflows.

EDUCATION — TWO BACHELOR'S DEGREES

BSc, Software Engineering & Information Technology — BSUIR (2014–2017)
BSc, Mechanical Engineering — BNTU (2008–2014)

FOREIGN LANGUAGES

English — B2 | Polish — B2+
